

Weather

Hmmm yes. Hot sunny weather for a week, all will be great...

Not necessarily true!

We are on the edge of autumn Blazers, which can only mean one thing.... prepare for all weather possibilities!

The weather at Blaze always takes people by surprise. It changes in an instant from sunshine to storm clouds, rain and lightning.

Never assume the weather will be great all week long, if you do you could be in for a shock!

**Prepare for the worst,
expect the best!**

Real life stories:

- At the first Blaze my tent was washed away and I never found it again.
- A few years ago it rained so much all my clothes were wet and my two mates and I had to share 4 dry socks between us.
- One year the wind came out of nowhere and broke our gazebo (poorly secured). It was totally bugged.
- With no notice a storm was on its way and a guy in chaps made us dig a trench around a theme camp to try and prevent from flooding. It was hectic.

Top Tips:

Regularly check weather forecasts but understand that it may not always be accurate due to our location. A weather station is set up at Ranger HQ to record and monitor on-site weather.

Prepare for all weather.

Bring extra ties, duct tape tent pegs, guy ropes etc.

Peg and tie down your tent/gazebo etc.

Bring waterproof clothing.

Have a waterproof tent (yes we wrote that).
